

Changes to your pharmacy plan

The enclosed chart shows changes that start on January 1, 2017. We're adding some brand-name and generic drugs to our pharmacy plan and specialty drug list. We're also removing others. Your plan's coverage requirements may also change.

You can get the most from your plan by knowing about these upcoming changes. We don't want there to be any surprises. These updates will affect the prescription drugs you take. So make sure you check out the summary of changes in the enclosed chart.

Find a preferred drug that's right for you

You can find a list of preferred drugs on your pharmacy plan and specialty drug list at www.ihfederal.com/pharmacy. You typically pay lower out-of-pocket costs when you use preferred drugs. You can still fill prescriptions for non-preferred drugs. But you may pay more. Don't worry. You can talk to your doctor about your treatment options. If your doctor agrees that a preferred alternative will work for you, ask to have your prescription changed.

We're here to help

If you have any questions, just visit your secure member website at www.ihfederal.com. Here you can:

- Find a network pharmacy near you online
- Learn more about what your plan covers
- Look up your drugs and know the costs
- Get convenient refills by mail order

Or, you can call us at the toll-free number on your member ID card.
